These modified practices are essential to ensure that OC Animal Care maintains the staff necessary to properly care for our animals and that staff are available to conduct adoption visits, process adoptions of new pets, and to facilitate the reunification of lost pets with their owners. The appointment-based model allows the opportunity for us to provide personalized service, eliminate long lines, and reduce adopter frustration.

Additionally, these modified practices have resulted in numerous benefits to the animals. Lower stress levels due to less foot traffic and the ability of staff and volunteers to more freely engage in enrichment activities have contributed to an improved experience for animals during their time with us by reducing animal fear, anxiety, stress, and illness.

Thank you for your understanding during this time and look forward to providing you with excellent service.
