

RABBIT CARE BASICS

Rabbits can live around 8-12 years. Owning a rabbit is a commitment.

Learn pet safety tips and check out the “Get Involved” page on ocpetinfo.com

Let's Paws

Enclosure

- Use baby gates to help facilitate an enclosed, indoor environment
- Make sure the rabbit has an accessible litter box
- Allow enough space for the rabbit to get exercise

Diet

- Provide unlimited access to hay and clean water
- Make sure to add green, leafy vegetables to their diet
- Treats are yummy, but give them sparingly

Enrichment

- Rabbit teeth never stop growing! Chew toys help keep their teeth comfortable
- Regularly introduce new items, such as chew ropes or woven grass, to increase exploratory behaviors

Health

- Spaying and neutering your rabbit can lengthen their life
- Schedule regular check-ups with your vet and keep vaccinations up to date
