OC Animal Allies	714) 964-4445	Offers vouchers for spay/neuter. Call at the end of the month.	

We know you may be concerned about un-spayed female cats becoming pregnant while access to spay and neuter is limited. Know that cat fertility experts are recommending temporary use of a drug called megestrol acetate (MA) as an oral contraceptive. If you can, ask your local veterinarian about using MA to prevent pregnancy in community cats. You can only obtain MA with a prescription from a veterinarian.
